PTO independent speed adjustment

safety stop causing immediate standstill

PTO switch

ergonomically designed and positioned levers

r.p.m. adjustment

rotatable handlebar (optional)

clearly arranged dashboard with charge level display

free-wheel device to activate from the bar

Leistungsstarkes 48V, 40Ah Köppl-Akkusystem mit Ladegerät

The short and compact design of the "Kompakt-Easy E" defines a new class for electrically operated professional hydrostatic drive units.

"Kompakt" dimensions and "Easy" to operate.

CEE with removable battery system fast and tool-free interchangeable GreenPack® double rechargeable 48V 30Ah battery system.

The known advantages of the "Kompakt Easy" – agility, manoeuvrability, high ergonomical standard, operator security – are still maintained. The revolutionary Köppl eDrive adds sustainability, quiet operation and environmental friendliness to the "Kompakt Easy E".

handlebar height adjustment

ergonomic handlebar design for reduced operator fatigue and greater output.

flange for rapid tool change

Kompakt Easy E

Köppl battery system

Drive	stepless, hydraulic
Speed	0-6 km/h forwards 0-3 km/h backwards
Electric Power	1,92 kW continuous output 3,8 kW peak output
Battery Power	48 Volt / 40 Ah
PTO	983 r.p.m. mechanical
Weight	87 kg

Kompakt Easy E

exchangeable battery system

Drive	stepless, hydraulic
Speed	0-6 km/h forwards 0-3 km/h backwards
Electric Power	2,9 kW continuous output 5,8 kW peak output
Battery Power	48 Volt / 30 Ah (1 battery) 48 Volt / 60 Ah (2 batteries)
PTO	983 r.p.m. mechanical
Weight	73,5 kg (without battery)

Köppl Kompakt Easy E Advantages

The Kompakt Easy E is built on the Kompakt Easy. The petrol engine is replaced by the Köppl eDrive – a powerful 48 V based rechargeable battery pack with optimized performance and power control system. The revolutionary concept of bringing the transmission power directly to the PTO in combination with the hydraulic traction drive makes the Kompakt Easy E competitive to known fossil fuel drive units.

Several easy to mount attachments, elaborate charging control and low-loss power transmission form the impression of a typical drive unit.

The proven Köppl drive unit characteristics like robustness and persistence are maintained.

- Extremely quiet – only attachment operating noise
- Long life Li-Ion-Battery – 2 to 3 hours operating power depending on attachment
- Powerful Battery – battery with optimized performance and power control system. Optional double battery system for more power
- Low Operating Costs – full charge of the rechargeable battery system is approximately 0,50 € (current electricity costs)
- Easy to maintain – can be charged at any electrical socket or charging station. Much less time-consuming as stockpiling fossil fuels and refuelling

All-Season Modularity

Available attachments

- Double Cutter Bar with DUOCAT Twin Cutter Drive
- Rotary Brush Mower
- Discs Rotary Mower and Flail Mower
- Rotary Hoe
- Weed Stripper
- Sweeper
- Snow Thrower and Snow Ploughs
