PLUG & PLAY LED LIGHTING

WHY LED LIGHTS?

CHEAPER TO OPERATE - LED Lights might cost more up front, but they provide larger savings over time. LED's last 5 times longer than HID and Halogen lights.

SAFER TO USE - LED Lights are more powerful than a traditional Halogen light, a brighter light provides longer distances drivers can see. The white color of LED lights and overall coverage of the light can also help reduce operator fatigue.

EASIER ON EQUIPMENT - Since LED's use less energy, this puts a lot less strain on the equipment's electrical system.

EASY TO INSTALL - Our lights are designed to be a direct replacement, "Plug & Play". They come with factory style brackets, connectors, and mounting points.

LUMENS

There are two common terms in the LED Light industry that relate to Lumens: Raw Lumens and Effective Lumens. Raw Lumens are measured when the lights first turn on. At this point the LED's are cold and have maximum output. After running, the lights get hot, and use the heat-sink to stay cool. Effective Lumens are measured when the LED's are at a constant operating temperature. Every time we use the term Lumens we are referring to the Effective Lumens.

COLOR TEMPERATURE

Color temperature is a characteristic of visible light, measured in units of absolute temperature on the Kelvin Scale (K). Lower temperature is described more as a warmer color, for example candlelight is around 1,900K. A Halogen light is a warm light with a temperature around 3,000K.

High temperature is described more as a cooler color, daylight is around 6,000K. The LED's we use have a temperature range of around 5,500-6,000K, which projects a clear white light that makes it easy on the eyes.

BENEFITS OF OUR LED LIGHTS

- IP68 Rating (Waterproof & Dustproof)
- Radio Frequency Interference Filter (RFI)
- Durable Poly Carbonate Lens
- Most lights will have a connector for Plug & Play applications
- Electromagnetic Interference Filter (EMI)
- Die-cast Aluminum Housing / Heat-Sink
- Stainless Steel Hardware
- Exact Fit, we do not use generic lights with will-fit brackets

LED Headlight Canbus Relay

Newer vehicles might require a Canbus Relay to be installed. Canbus Relays, also known as Warning Cancelers, prevent a "bulb out" indication that may occur on vehicles with complex on-board computers. These relays can be attached in-line between light and vehicles wiring harness. One relay per light bulb.

TLCR13

If your vehicle has a bulb that uses a ground sensor to detect a "bulb out," then it will require our Canbus Relay that is negative controlled.

About Us

Tiger Lights is a family owned manufacturer of LED lights for agricultural and industrial equipment. Skillfully engineered LED lights provide Tiger Lights customers with a wide range of LED lighting from off-the-shelf models to customized products. From our corporate headquarters in Tangent, Oregon to our dealers nationally and internationally, Tiger Lights is ready to assist you with all your lighting requirements.

We use the latest technology and American made components in each light that will provide many years of service. Tiger Lights is the only LED light company that offers a limited lifetime warranty on all our Plug & Play lights because we know our lights are the best out there. We are also the only company producing off-road lights that is authorized by CREE®.

The foundation of Tiger Lights is providing sales assistance to customers who rely on our extensive knowledge of agriculture equipment. After the sale, Tiger Lights offers fast, friendly, and efficient answers to LED lights and service questions. We are a company of experienced, conscientious people working together to build superior lights for customers who require performance and value. Our success relies on providing standard and custom solutions to new and existing customers who view Tiger Lights as the best choice for LED lighting. From answering preliminary questions, to providing comprehensive quotations from complex specifications, from fast deliveries to service follow-up after the sale, our employees are dedicated to exceeding your expectations and requirements.

All Plug & Play LED Lights that Tiger Lights sell come with a Limited Lifetime Warranty.

DISCLAIMER: The use of original equipment manufacturer (OEM) part numbers or trademarks, e.g. Case® and John Deere®, are for reference purposes only and for indicating product use and compatibility.
