boschung

Technician's

courses

Information and program 2012

Information and general terms and conditions for training courses carried out by MARCEL BOSCHUNG AG:

Registration

On our website using the online form or in writing using the registration slip (post, fax or email).

Confirmation

You will receive a corresponding course confirmation together with the exact course schedule one week before the start of the course at the latest.

Cancellation by the organizer

A minimum number of participants is required for the training courses. If the minimum number of participants is not reached, MARCEL BOSCHUNG AG reserves the right to postpone or cancel this course.

Certain courses can only be carried out under winter weather conditions. For this reason, MARCEL BOSCHUNG AG reserves the right to postpone or cancel the course in the event of act of God. In any case we will inform you about any cancellations/postponements as soon as possible.

Cancellation by the customer

The customer may cancel the contract free of charge at any time up to one week before the start of a course from the training program of MARCEL BOSCHUNG AG. If the cancellation is not received in time or if registered participants fail to attend the course without cancellation of the contract the customer will be charged 50 % of the course fees.

Terms of payment

The course fees include extensive course documentation, teaching aids as well as course refreshments including lunch (food and drink not included for courses at customer site). Invoicing is carried out upon completion of the training course, payable net within 30 days.

Course documentation

The course documentation contains copyrighted information. All rights, particularly those concerning reprinting and copying of the documentation or parts thereof are reserved by MARCEL BOSCHUNG AG.

Insurance

The participants are responsible for organizing their own insurance protection during the training course.

Alternative course dates

The number of participants is limited to ensure learning success. If the course chosen by you is already fully booked we will provide an alternative course date in writing which you need to confirm.

Final provisions

Any disputes arising hereunder will be settled before a competent court of law at the registered office of MARCEL BOSCHUNG AG.

About

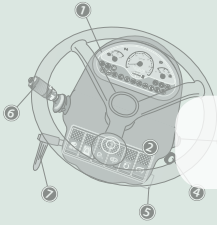

BOSCHUNG training

The modern BOSCHUNG special purpose and cleaning vehicles deliver exceptional performance and are also easier and safer to operate than their predecessors of recent years.

What may at first sound like a contradiction – versatility coupled with ease of use – is precisely what BOSCHUNG technological research has achieved: Mechanics, hydraulics and electronics as integral components of an operating concept that focuses on the user.

Whereas, in the past, operators had to study file after file of technical instructions before they could get near their machine, today all they need is *BOSCHUNG* training.

Available for virtually the entire range of BOSCHUNG vehicles, *BOSCHUNG* training courses provide exactly the information you need as an operator or technician to get the most out of your machine – no more, no less.
