

## TRUSTING, A LEADING-EDGE INNOVATIVE BRAND

The European leader in brake shoes joined the Metelli Group in 2014, bringing with it the widest range of applications for Japan, Europe & Korea. The Trusting brand is also associated with innovation, as it was the first to manufacture 100% asbestos-free brake shoes and the first to assemble the accessories only after the coating process. So that the spirit and style of operations are maintained fully intact, production remains in Italy – where activities first began, more than 30 years ago. All Trusting brand products are ECE R90-certified.

OVERVIEW**

## BRAKE PARTS

### BRAKE DISCS

With approximately 1,400 items, our range covers the entire European, American and Asian car parc. The brake discs are made in cast iron with varying percentages of carbon according to the performance needed by the vehicle. We have solid discs and selfventilated discs, and a wide range of coated brake discs to keep them looking good.

To coat the brake discs we use ALUTHERM® 80 or DSP® paint. The first leads to a lower environmental impact compared to solvent-based paints – and higher corrosion resistance. The DSP® paint makes the disc ready to use, so there's no need to degrease them before mounting. And every one is ECE R90 certified.

### BRAKE SHOES

Our constantly updated range of brake shoe products consists of more than 700 items – and like all our safety-critical parts, every one is certified ECE R90. Every brake shoe is made with meticulous attention to detail from high quality raw materials.

### PRE-MOUNTED BRAKE KITS

With more than 430 brake kits, we have the most extensive range on the market. With all the components pre-mounted, our brake kit allows you to replace every component which can become worn – making assembly easier, faster and safer. Also, to make life quicker and easier when ordering, we have pre-mounted (self adjusting) Brake Shoe Kits, Reduced Fast Kits (without cylinders), and Repair Kits with wheel cylinders.

### HYDRAULIC BRAKE & CLUTCH PARTS

Apart from a full range for aftermarket, we supply original equipment braking systems and brake parts for other brake manufacturers. This includes wheel cylinders, brake master cylinders, pressure regulating valves, slave and master cylinders for clutches and more. All these are produced in different quality materials including cast iron, aluminium and plastic.

### BRAKE PADS

Depending on the specifications, our brake pads are made with compounds of different composite materials. We are currently launching our very own compound, **HybriX®** – a new technology which sets a new benchmark in the field. Brake pads made with the **HybriX®** compound have an unmatched combination of performance and comfort. Of course, they're certified according to ECE R90, and as an added bonus they're copper-free.
