Be on Trend with Radox

Radox is one of Europe's leading manufacturers of designer radiators and quality heated towel rails and has been established in the UK since 2008, with its head office and warehousing facilities in Wiltshire.

With a wealth of experience in design, thermo-hydraulics, metal fabrication and treatment, specialised polishing, galvanizing and epoxy coating, we have built a portfolio of products that offers our customers a touch of luxury for their homes.

Working in partnership with industry-leading suppliers such as Marcegaglia and Akzo Nobel allows us to guarantee that our products are manufactured using only the highest quality raw materials. We follow a strict environmentally-friendly production process, avoiding the use of materials that produce harmful by-products. This is backed up by our ISO: 9001 and ISO: 14001 certifications, which we have proudly held since the Factory was first established.

Our Quality Control team monitors every step of the manufacturing process to ensure that we offer you beautiful, durable radiators guaranteed for a minimum of 10 years, to give you the peace of mind that you deserve.

Ask your designer about Radox and together you'll find plenty of options to enhance the design of your space.

Finishing Guide

Standard paint finishes and Paint Colour Options

Painted rails are sandblasted prior to powder coating, which greatly increases paint adhesion and corrosion resistance. We only use Akzo Nobel paint, one of the World's highest quality paint manufacturers. **Paint Colour Options have an estimated 8 week lead time.**

Quartz Finishes

With so many colours and finishes to choose from, the Quartz glass fronted ranges can be utilised in any part of the house. Whether you want a mist-free mirror in the bathroom or a radiator to match your tiles, splashbacks, furniture and more, these glass-fronted radiators can offer the perfect solution. **Quartz radiators have a 3 week lead time.**

Highest Quality Chrome Plating

The preparation of our radiators for chroming involves specialised, multi-stage polishing and cleaning. The decorative chrome plating is enhanced by the double-Nickel plating applied to the highly polished mild steel, followed by chrome plating. This offers superior corrosion resistance, durability and a contemporary appearance. Multiple salt spray tests have proven that this is the highest quality chrome plating for decorative radiators, designed to withstand the high levels of humidity in the bathroom and repeated temperature variation cycles. The stress of these factors on chrome-plated radiators is so great that it can in time lead to cracks in the Nickel and Chrome layers, causing oxidation of the exposed steel and exfoliation of the chrome. We are so confident in the durability of our chrome radiators that we guarantee them for 10 years.

Stainless Steel

So confident are we of the robust quality of our stainless steel, we are prepared to guarantee it for 25 years. Made from 100% recyclable, eco-friendly, solid stainless steel- an excellent choice when corrosion resistance is important- our towel rails are suitable for fitting on most types of heating systems and will provide higher heat output than the equivalent sized chrome plated options.

Radiator: Quartz 1500 x 560 in Bride with 350 open-ended Towel Bar
Valves: Cube Angled in Chrome

Quartz

These unique and innovative glass radiators have been designed with every need in mind. Bring an injection of colour, as well as warmth, into any room, with shades to suit every taste. If it's functionality you're after, the radiators are available in several mirrored finishes and can be fitted with a towel bar.

Minor colour variations may occur in final product.

Capable of having one optional towel bar fitted. If further towel bars are required, please ask at point of order.

Quartz finishes have a 3 week lead time.

Finishes

Please refer to page 5 to select from the extensive range of glass finishes.

Heating Options

*Only available with a thermostatic element.

*Radiators required for use with an electric option must be ordered accordingly.

Towel rail: Premier Stainless 1200 x 400 in Stainless Steel
Valves: Circulus Angled in Chrome

Premier Stainless

The Premier Stainless heated towel rail is made from highly polished, solid stainless steel, which makes it one of the most durable products on the market. It is suitable for most central heating systems and has 22mm crossbars and 38mm collectors, having superior output compared to any similar radiator.

2 Year Guarantee on Accessories

Standard Electric

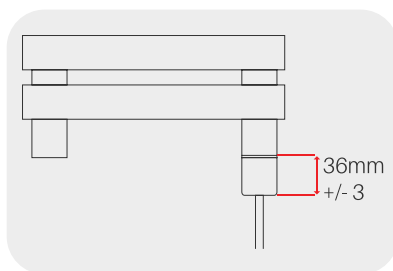

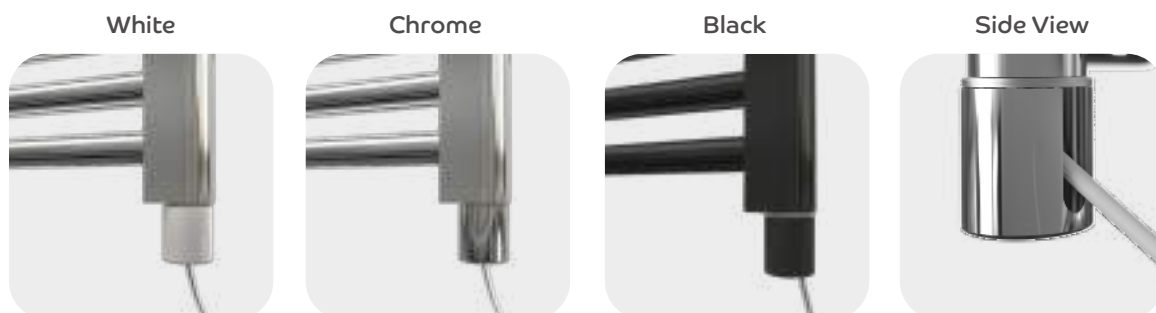

To be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Standard Electric option does not come with an adjustable temperature control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard all electric radiators are rated IP55.

Product Code	Model	Finish	Price (£) ex VAT.	Price (£) inc VAT.
RXEL-100WSTD	100 Watt Standard All Electric	Standard	£146	£176

RXEL-400WSTD	400 Watt Standard All Electric	Standard	£146	£176
RXEL-600WSTD	600 Watt Standard All Electric	Standard	£146	£176

Important Information:

Internal Operating Temperature Range of towel rail or radiator using this element: 65°C (note: with standard electric elements, the surface temperature of towel rails (specifically chrome plated towel rails) can get hotter than 65°C (up to 70/80°C in some cases) due to various factors (capacity, surface area, material type etc). Consider thermostatic or other regulatory devices if surface temperature could be an issue for you. Electric radiators should only be fitted in the bathroom by a qualified electrician, in accordance with IEE regulations. Prices to be added to cost of the radiator.

2 Year Guarantee on Electric Options

Thermostatic Electric

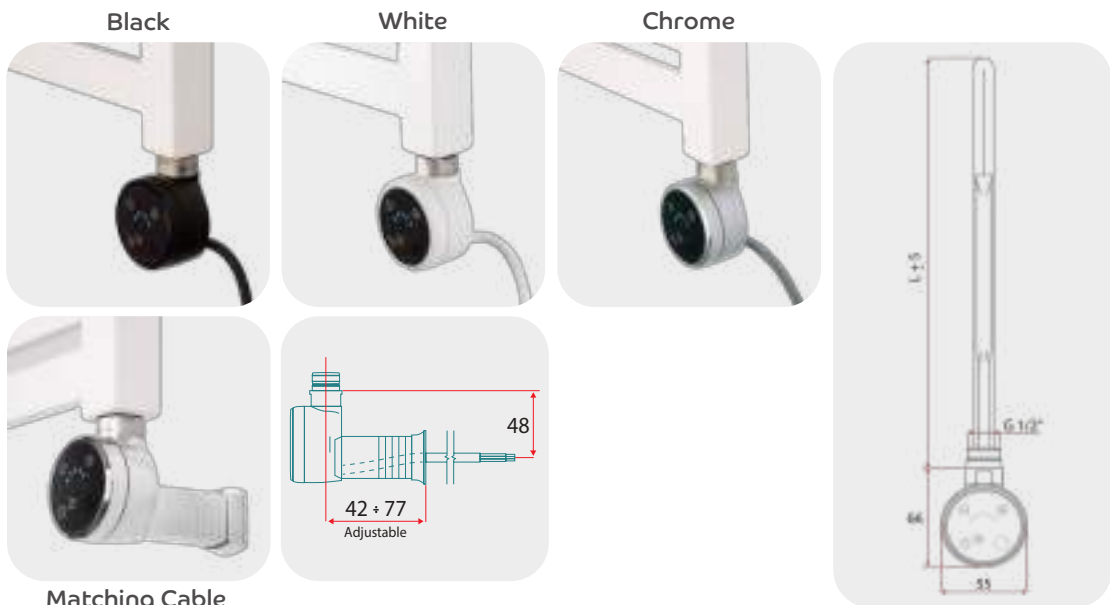

To be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Thermostatic Electric option comes with an adjustable temperature controller which regulates the temperature of the radiator and can be used with a compatible remote control - see Page 79 for options.

The elements used in Thermostatic Electric options are rated IPX5.

Standard Hybrid Heating

To be added to chosen towel rail

Hybrid Heating (Dual Fuel) kits enable you to use your towel rail on your central heating system or as an electric option, when the central heating is not being used. Simply ask your fitter for operating instructions.

The cost of your chosen Hybrid Heating option should be added to the cost of the radiator. Radiator valves will also be required for Hybrid Radiators (please see pages 77 & 78).

The Standard Hybrid Heating option does not come with an adjustable control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard Hybrid Heating options are rated IP55.

Visit our website for technical drawings and fitting instructions

Disclaimer

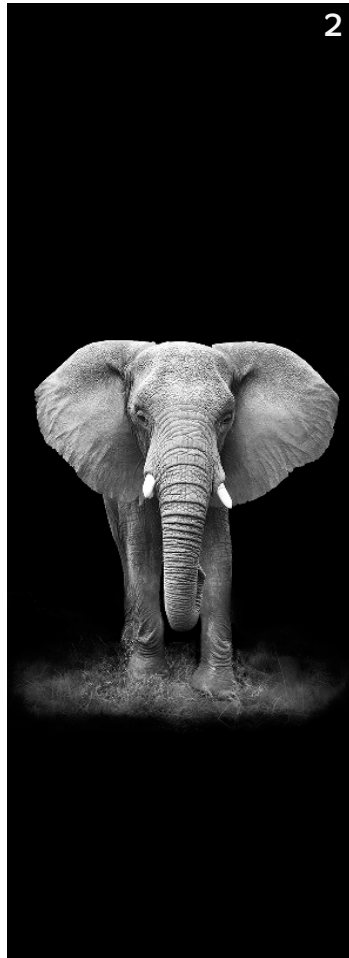

Radox Radiators Ltd provides wall plugs and screws that are only suitable for fitting on concrete and brick walls. Our wall plugs and screws are designed to be used exclusively for the purpose of fitting radiators and towel rails. It is the responsibility of the fitter to ensure that the wall is suitable for the installation of our products and to determine if any additional support or fixings are required.

Radox Radiators Ltd accepts no liability for any damage or injury that may occur as a result of the fitting of our products on an unsuitable wall. By using our wall plugs and screws, the fitter assumes full responsibility for the installation and any associated risks.

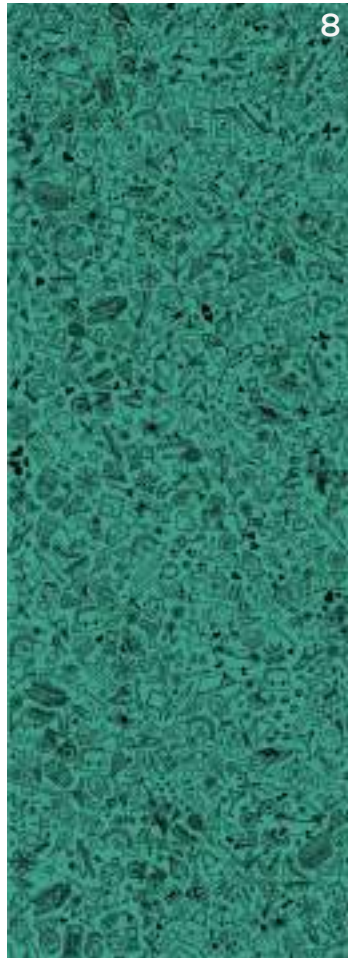

The mild/carbon steel radiators are for use on closed heating systems only; they are NOT suitable for installation on secondary (open/domestic hot water) circuits.

After installation, the entire system must be thoroughly cleaned and flushed to remove any remaining residues, followed by dosing the system with a suitable water treatment solution to prevent corrosion, in accordance with BS 5449: 1990, BS EN 12828: 2003 and BS 7593: 1992

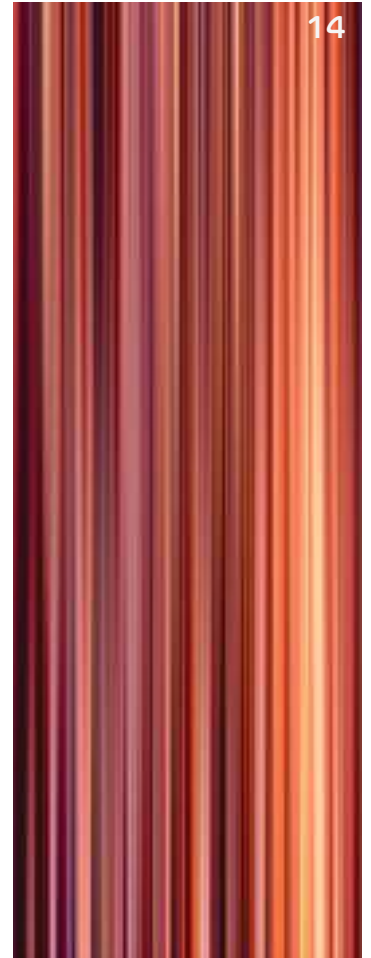

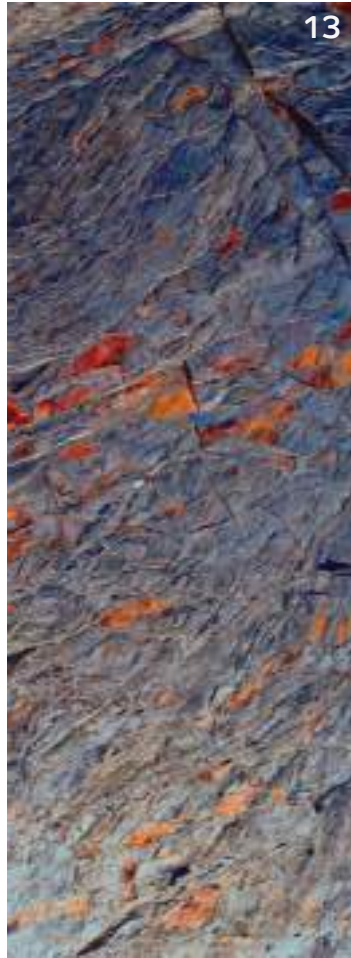

The Stainless-Steel radiators are made from highly polished, 304 grade solid stainless-steel, which offers a high resistance to corrosion and are suitable to use in most types of heating systems.

Returns Policy

Unwanted Goods are expected to be returned in their original packaging and should be returned within 30 days; 20% re-stocking charge on returns or a minimum charge of £25 +VAT will usually apply, but this will be handled on a case-by-case basis and may depend on the Goods being returned.

Items delivered must be checked for damages and/or aesthetic imperfections BEFORE installation. Installed items are deemed to be 'accepted' and are non-returnable.

Made-to-order items (bespoke sizes and finishes, glass radiators and electric towel rails and radiators) are non-returnable.

Any discrepancies with orders (size, finish, quantity, etc.) should be reported within 48 hours of receipt.

Please check your delivery carefully. If you notice any signs of damage to the items or packaging, please sign for the goods as 'damaged' as a precaution and report this to Radox Radiators Ltd immediately (no claims can be made with our courier after 24 hours following delivery of the Goods).

Carriage

Orders totalling a value of less than £50 + VAT will incur a carriage charge of £5 +VAT.

Carriage charges may apply for some large, fragile items.

Important

Radox reserves the right to change designs and specifications in the interest of product development, without prior notice.

Custom made items are non-returnable – this includes electrical items. Please contact the office for further information.

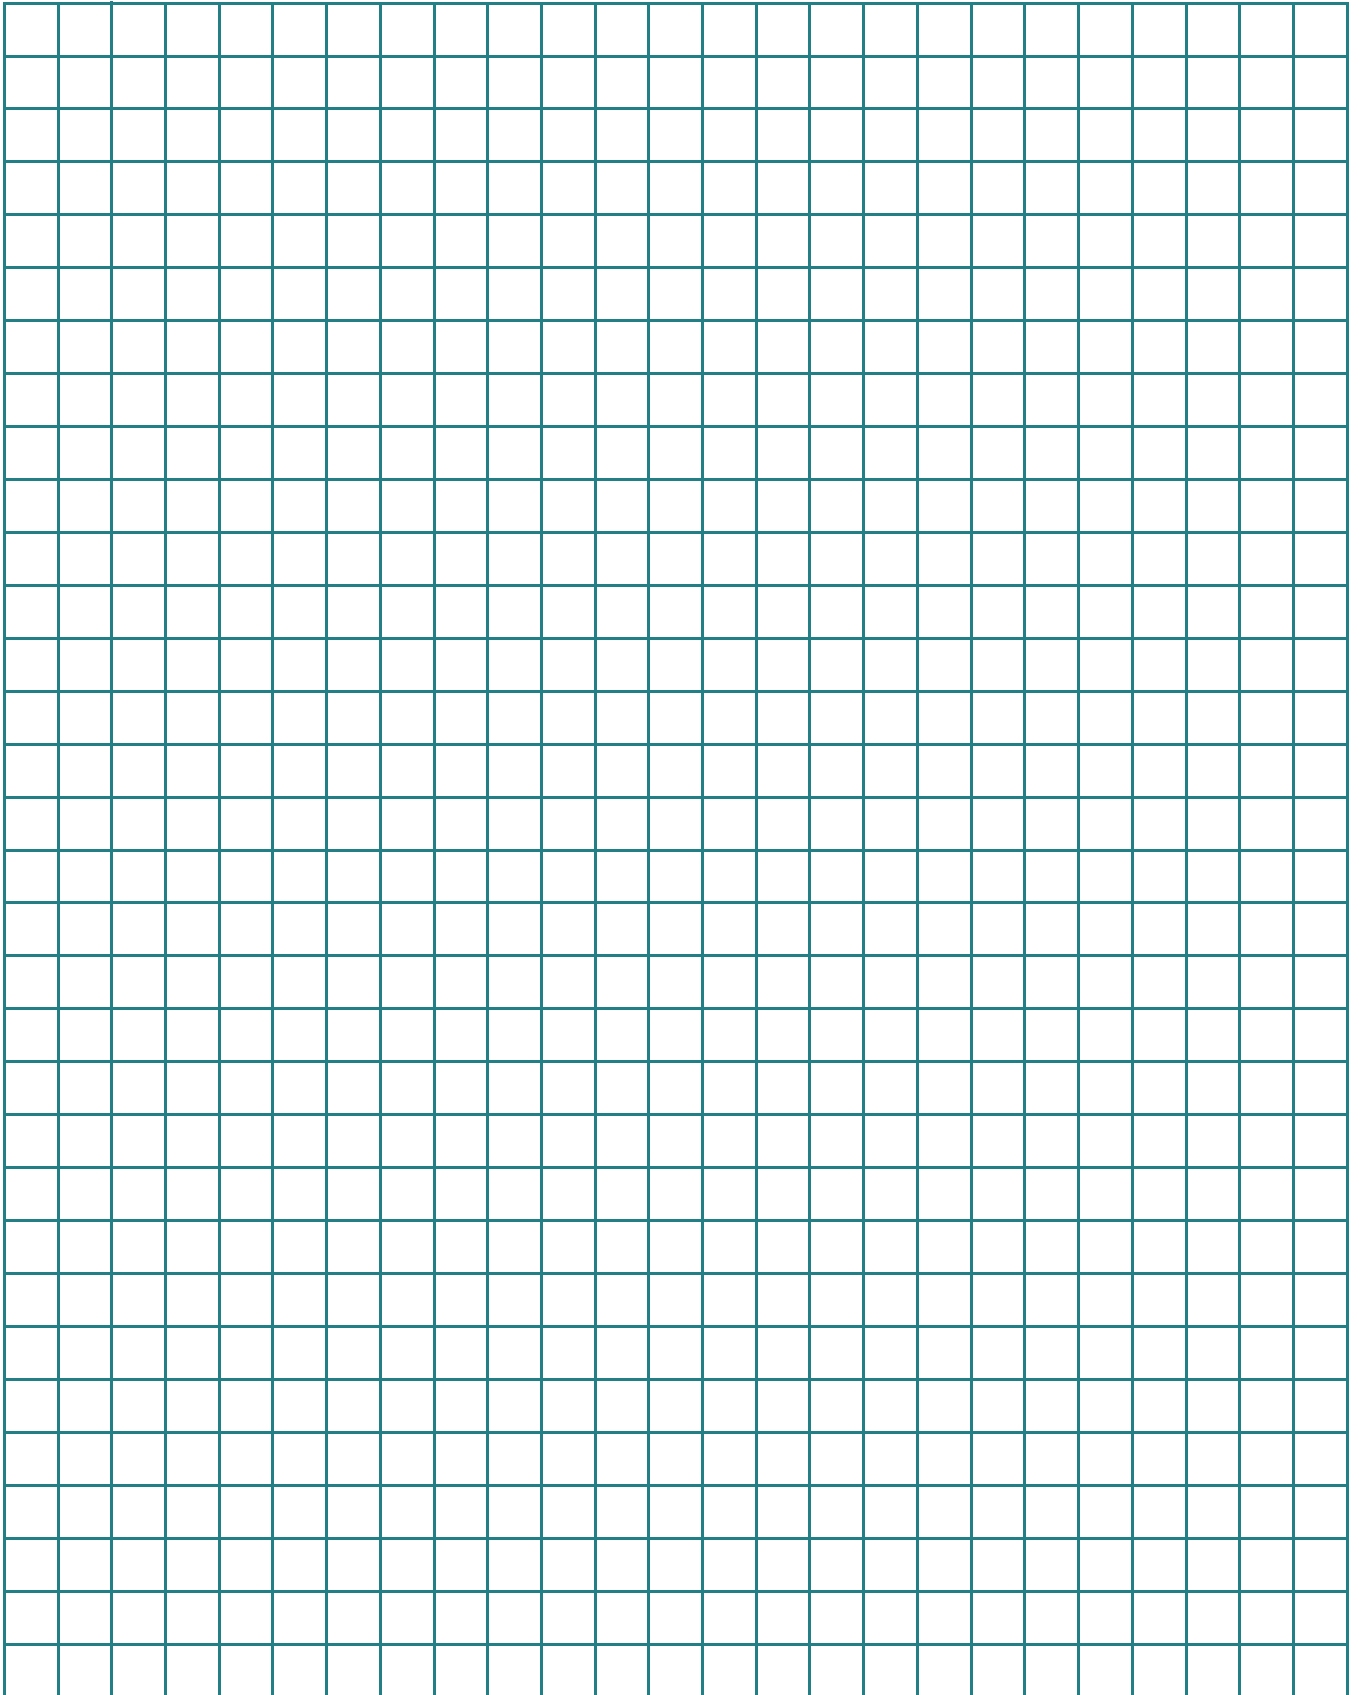

To view our full terms and conditions, please visit www.radoxradiators.com

Bespoke Sizes

We understand that one size does not work for everyone. We can produce most of our radiators and towel rails in bespoke sizes to suit your requirements. If this is something you are interested in, please get in touch with one of our team members, who will be happy to talk through this option with you and give you all the information you need.
